

Connecting to the ImageNow QA system

Background

In some cases, users need to access the ImageNow QA system to test or to have training sessions. Accessing the QA server requires an additional connection profile. This job aid details the steps to create this additional profile.

Assumptions

1. User has been granted proper access to the system and is part of a specific group.
2. User knows how to log into the system.

Accessing ImageNow QA

1. Double click on the ImageNow shortcut on your desktop (for **SAIT** supported users: please **do not** use the “Campus ImageNow” shortcut).
2. On the **ImageNow** dialog box, click on the **Connection Profiles** menu

3. Click on **Edit Connection Profiles**
4. Click on **Create**
5. On the new **Connection Profile** enter the following info:
 - i. Name: QA
 - ii. Server ID: img-qa01.ist.berkeley.edu
 - iii. Server Type: Test
 - iv. Port Number: 6000
 - v. Click OK
