

Services Framework

Services Framework

Questions that need to be addressed to shape this direction

- How do we expand on what's available and make it accessible?
 - How is scholarly practice attached to a service identified? What is the method for selecting that service?
 - How will existing tools work with to fit the service framework?
 - How might we make sure that our framework supports the live creative act (capturing that content for use)?
-

Direction name

Scope

- How should we articulate the scope of this direction?

Rewards

Risks

Tasks

Task descriptions

- Review the preliminary activities list
- Flesh out missing activities
- Name each activity
- Roughly define each activity
- Note related tools
- Note related Standards

Questions

- Which of these tasks needs further clarification?
- Should any tasks be added?
- In what order would you prioritize these?
