Quinn Dombrowski, quinnd@berkeley.edu

Dean Irvine, the person in charge of AHA, is an English professor in Canada who has led a number of Drupal-based digital humanities projects. He deals with the logistics and paperwork for a number of developers he's worked with who want to do freelance work on academic projects. He has extensive experience with higher ed, particularly the humanities, and communicates well with faculty, including those with little or no technical experience (though I've volunteered as a technical go-between for these projects.)
