

Documentation Wiki - Home - BDOC

All but Web Services APIs page tree have been migrated OUT of this space. After 22 Mar 2013, that last page hierarchy will be migrated out of this space, and the space will be left empty in anticipation of decommissioning this instance of Confluence (archive moving to wikihub.berkeley.edu; final documentation for the project to be located at:

<https://wikihub.berkeley.edu/display/pbamboo/Documentation>

This wiki space is the home of **user-facing documentation for Project Bamboo**.

Navigation links to key documentation can be found at the top of the **sidebar on the left**.

"User-facing" includes all types of users, including end-users of Research Environments; developers who code to the [RESTful service APIs of BSP-hosted services](#); developers who code to the [SOA-level Java APIs of BSP-hosted services](#); Bamboo project administrators who create and configure mailing lists, JIRA projects, wiki spaces, etc.; Bamboo system administrators who are responsible for deployed instances of Research Environments and the Bamboo Services Platform; etc.

The home page is the parent of top-level pages that contain types of documentation. Not all of these pages (and their children) are public. For example, system administration pages are visible only to system administrators.
