<td>Dean Irvine, the person in charge of AHA, is an English professor in Canada who has led a number of Drupal-based digital humanities projects. He deals with the logistics and paperwork for a number of developers he's worked with who want to do freelance work on academic projects. He has extensive experience with higher ed, particularly the humanities, and communicates well with faculty, including those with little or no technical experience (though I’ve volunteered as a technical go-between for these projects.)</td>

<td>Kanopi Studios is a web agency focused on data-informed &amp; human-centric solutions. We design, build and support WordPress and Drupal websites for clients that want to make a positive impact. Kanopi founder and CEO Arnie Stefanik have a long history of involvement with the San Francisco open source community and are the lead organizers of the Bay Area Drupal Camp (BADCamp), the co-organizer of San Francisco Drupal User Group (SF-DUG), and Kanopi is part of the WordPress Camp US (WCUS) organizing team. All of the staff are senior-level experts, many are thought leaders in the field, and as a fully distributed team, they hire the best design and development talent across North America. They are proud members of the Drupal Association and active WordPress and Drupal community contributors.</td>

| Project 6 | http://www.project6.com/ | UCB Principal Leadership Institute | 2013/11/26 | Daphannie Stephens, ConnectEd
I can't say enough about how highly I recommend Project 6. They are outstanding to work with on every level. They are absolute professionals with an ability to be innovative and creative that is noteworthy. Unfortunately, you do not often find such a high dose of creativity, collaboration and professionalism in one organization or individual but it can be found at Project 6. I was most impressed with their ability to problem solve and design around a number of challenges. They are just amazing!

I have experience getting the sites set up on Pantheon, integrated with CalNet, and have multiple strategies for importing events from events.berkeley.edu and courses from OSOC. I'm also insured to do contract work for UC. |
